Purchase Questions What is the base of the bed L&P; P that can be adjusted equipped with mattress? Not. The base is an independent part of the bed that replaces the boxspring. A friendly mattress that can be customized of your choice is on top of the base. Please Help FAQ under Mattress Selection for more information on mattress options. Do I still need boxspring? No. A Leggett &P; Platt adjustable bed base replaces your boxspring. You put your mattress directly on top of the base. If you have a bed with side rails, the base fits inside most of the bed frame and then the mattress fits on it. How much is the basic cost of an adjustable bed? Each retailer determines a customizable base price. To get a price overview, you can visit a local store or check out the retail website. Do I still need a bed frame? No. A Leggett &P; Platt adjustable bed base replaces your bed frame. It has its own legs, which lift your bed off the floor. In some cases, adjustable high legs are available so that you can change the height of the bed. Can I use L&P bedding P that can be adapted to my existing bedroom furniture? Yes. Base leggett &P; Customizable platts are designed according to industry standard bed sizes. The base easily attaches to most standard size headboards and footboards with the addition of boxspring frames. Even if your bed has side rails, the base is meant to fit into most of these pieces, similar to standard boxspring. In addition, you may want to check out our photo gallery to see how L&P bases are The adjustable P is integrated with a variety of bedroom furniture. Does it require a special sheet? Wakakak Base bed leggett &P; Adjustable platt is compatible with standard bed linen. However, if you buy a separate king (the base where the left and right sides move independently with two mattresses), you should use two sheets of twin XL fitted - one for each side. Is my bedskirt suitable? The standard size will fit the bed, but you may have to cut a hole in the skirt platform to accommodate the mattress retainer. If so, it is recommended that you iron the fusible interfacing to the back of the skirt platform for reinforcement; this will help prevent its decomposing in the future after washing. Another suggestion to prevent decomposing is to sew the buttonhole into the bedskirt. Where can I buy leggett bed base &P; Customizable platt? Customizable bed bases are sold by many types of retailers, including mattress companies, department stores, and furniture stores. Features What is the zero gravity position? The zero gravity position at the base of the adjustable bed mimics the position the astronaut took during takeoff. This position is intended to relieve stress on your bodies as they escape earth's gravity. Position up to the same level as the heart. People who experience back pain or who want to improve their circulation often find this position very relaxing. What does WallHugger mean® that? Leggett Innovation Team &P; Platt develops advanced technology that puts you at the center of bed movement. While another adjustable bed base lifts your upper body away from the wall – and away from your desk – the base with WallHugger® engineer your lift while simultaneously sliding you back. Yang Yang Your favorite books and remote control are within range whenever you are ready for them. Can I change my adjustable base height? Yes. Many basic models can be customized including height adjustable legs. On models that come standard with solid steel feet, foot height kits are available for separate purchase. Please check your owner's manual for available heights. If your base becomes standard with casters, they can be removed to reduce height by 2.5 inches. What is the basic weight of my adjustable bed? The average base weight is between 150-200 lbs. What is the difference between wallhugger and non-WallHugger bases? WallHugger's base raises your upper body while sliding back, keeping your favorite tables and belongings within easy reach. On the other hand, the non-WallHugger base lifts your upper body away from walls and tables. Watch our video for a quick demonstration: Service What happens if I get my bed base house that can be customized and I'm not satisfied with it? The return policy is set by each retailer. Located 1) on the front of the owner's manual; 2) on the back of the remote control; and 3) at the bottom of the base. The Split King base will have two serial numbers. What should I do if my bed base or adjustable remote control isn't working properly? What should I do if I lose my remote control? Remote control troubleshooting illuminates and seems to be operable but will not activate the adjustable bed base. Verification plugged into a working, grounded electrical outlet. Grounded power surge protection devices are recommended. Test the outlet by plugging in another work tool. One button on the remote control does not work. No features of the customizable base will be activated. Try these troubleshooting steps or contact Leggett Base Customer Support &P; Platt Adjustable. Program the remote control. Instructions for programming procedures are in your remote control manual. Download your remote control cable, wait 30 seconds, and plug in to reset the electronic components. The electric circuit breaker may have tripped. Check the electrical service disconnect box to verify. Faulty surge protection device or electrical outlet. Test the outlet by plugging in another work tool. The adjustable bed base will not work after a power outage. Unplug the power cord, wait 30 seconds, and plug it back in. The remote control will not illuminate. Replace the battery in the remote control. The head or legs will increase but will not return to the horizontal (flat) position. Basic mechanisms may be hampered. Raise the base and check the barrier. Remove the barrier. The head may be too close to the wall. The headboard may be too close to the edge of the mattress. Verify the distance of 1.5 (38.1mm) to 2 (50.8mm) between the headboard bracket and mattress. Adjust if needed. Increase the head or leg short distance (with remote control) to align the lift/bottom mechanism with the base support platform. Excessive motor noise Verify that the base is not positioned against walls, tables, or other objects that may cause vibration or noise. Verify the headboard brackets have been removed during installation. Remove the headboard bracket if it is still attached at the bottom of the base. If the base is located on a hard surface floor, place pieces of carpet or rubber spacing cups under each leg or caster base. (See the accessory sheet for rubber distance cup order information.) If the adjustable base is mounted on top of the bed frame, verification of the massage motor does not cause the bed frame (or bed frame components) to vibrate. Verify that the hardware of the headboard attachment is firmly tightened (if used). Verify the leg extension is firmly tightened (if used). Verification does not exist under the base station that may cause noise during customizable base operations. If an air mattress is used, check to see if the pump is a source of noise. Remote control operations are being streamed by other wireless control sources in the home. Unplug the base station from the power source and disconnect the battery from the remote control. Reinstall the battery and press any button on the remote control to rebuild communication. The adjustable bed base will not work after motor replacement. If the base is on its side, turn right-up. The safety switch can be activated, preventing the base from working. The base of the adjustable bed does not rise smoothly. Basic mechanisms may be hampered. Raise the base and check the barrier. Remove the barrier. If using the GW02 remote control and the clock appears dimmed, replace the battery in the remote control. The bed is not level. Caster or leg may be damaged. Replace the caster or leg. Verify all feet are on the same surface. What should I do if this does not work or I have a problem that is not listed here?
